

Table 1: Number of households (post reconciliation) on administrative and RCA list.

	Number of Households (Post Reconciliation)		
	On both lists	Only on RAdm List	Only on RCA list
Tomi	33	2	0
Goundam Touskel	36	5	5
Anguira	65	7	17
Tomba	114	3	60
N'goro	120	10	38
Total = 515	368	27	120

Table 2: Comparing average household demographics and wealth based on a sample from the revised administrative list (RAdmL) and a census from the rapid community appraisal (RCA) listing.

Average & 95 % Conf. Interval <sup>(1)</sup>	Tomi		Goundam Touskel		Anguira		Tomba		N'goro		Total Population

# observations <sup>(3)</sup>	11	33	14	41	24	79	39	170	60	158	148	481

<sup>(1)</sup> Confidence intervals are based on t-values for averages and continuity corrected z-values for proportions.

<sup>(2)</sup> For Anguira and Tomba, data on cattle, sheep and goats were collected in a qualitative manner (i.e. 1 if households possessed cattle or sheep & goats and 0 otherwise). Consequently, numbers for Anguira and Tomba are not considered in the figures found in the last column. Figures in italics for these two villages are percentages of households reporting ownership.

<sup>(3)</sup> For 7 households on the RCA list in Anguira (3) and Tomba (4), information was missing or incomplete. As their number is negligible compared to the total population for these 2 villages, their potential impact on the census averages has been ignored.

Table 3: A comparison of total village demographics and wealth based on a sample from the revised administrative list (RAdmL) and a census from the rapid community appraisal (RCA).

- # draft animals	9 " 15	7	23 " 22	11					4 " 8	2	31 " 23	20
- # cattle/household	26 " 40	25	88 " 42	89					49 " 29	41	148 " 58	155
- # sheep&goat/household	191 " 355	103	182 " 117	190					163 " 88	126	478 " 274	418
# observations	35	33	41	41					130	158	206	232

<sup>(1)</sup> For Anguira and Tomba data on material possessions (carts, ploughs and proahs) and animals were collected in a qualitative manner. Consequently, for these two villages indicators on asset ownership have not been reported and the totals in the last column reflect asset ownership for the total population in the remaining villages.

Table 4: A comparison of average household demographics and wealth obtained by household surveys (HHS) versus rapid community appraisal (RCA)

	household average across villages		
	HHS	RCA	t- or z-value <sup>(2)</sup>
<b>Household Demographics</b>			
- household size (residential)	5.62	5.94	- 2.66 *
- # migrants/household	0.70	0.78	0.67
- % Sonrai households	68	72	1.32
- % male headed households	96	92	1.33
# observations	148	148	
<b>Household Wealth <sup>(1)</sup></b>			
- # carts, ploughs and proahs/ household	0.29	0.15	2.8 *
- # draft animals/household	0.09	0.15	1.61
- # cattle/household	1.83	0.72	3.36 *
- # sheep&goat/household	5.93	2.32	3.54 *
# observations	85	85	

<sup>(1)</sup> For Anguira and Tomba data on material possessions (carts, ploughs and proahs) and animals were collected in a qualitative manner. Consequently, averages reflect asset ownership per household in the remaining sample.

<sup>(2)</sup> \* statistically significant at 5 % level; paired sampled t-value for comparison of means, paired sample z-value for comparison of proportions;
